

Digital Girl, Inc.

A STEM PROGRAM. ENRICHING GIRLS FROM THE ROOT.

PRESENTS

Con Edison's Job Shadow Program:

Empowering Careers

Con Edison offers students in 8th through 12th grade insight into what it's like to pursue rewarding careers in science, technology, engineering, mathematics (STEM) and other fields.

Empowering Careers gives young people a chance to engage with utility industry professionals. Students learn about careers in engineering, law, technology, media, and other areas at Con Edison. They also discover how to evaluate potential careers based on their skills and interests, and what is required for each position.

Digital Girl, Inc. is proud to be a part of Con Ed's Job Shadowing program and we are seeking participants who would like to benefit from this life changing opportunity. Student benefits include:

- * Awareness of various professions and career opportunities
- * Interactive workshops with Con Ed
- * Exposure to executives and professionals
- * Increased knowledge of personal and academic requirements to transition into the workforce, and achieve certain positions.
- * Opportunities to socialize with peers from other non profit organizations and schools.

To get involved please contact:

ABOUT CON EDISON

Con Edison is committed to supporting programs that enhance educational endeavors. They support programs that enrich science, technology, engineering and Math.

For over a decade, they have worked with partner organizations to invest in STEM education.

The company provides yearly support to hundreds of programs with over \$1 million in financial and in-kind contributions, benefitting schools throughout NYC and Westchester county, including Digital Girl, Inc.

ABOUT DIGITAL GIRL, INC.

Digital Girl, Incorporated was founded in 2014.

Our mission is to encourage inner city youth, especially girls to pursue careers in Science, Technology, Engineering and Math. We are motivated by the United States overall lag in producing an adequate number of STEM professionals and the under representation of women.

Through early application, hands on training, mentorship, tutoring and social events Digital Girl, Inc. will boost confidence, raise self esteem and STEM career awareness within less fortunate areas to create professionals who can be positive contributors to society.
